*THE POWER OF BEING CONNECTED.*

**ABOUT ALLIANCE**

Alliance Corporation is a North America company, in business as a distributor and cable specialist since 1993. Our business was originally named Alliance Cables so our business has always had a large focus on cables. Over time our business has grown to encompass a wide variety of products for both wireless and wireline applications.

**ALLIANCE MANUFACTURING: AC-LINE CABLES**

Alliance cuts, assembles & terminates all kinds of cables including power, coaxial and fibre optic. We have two specialised fibre clean rooms where the fibre optic cables are cut and connectorised. Also in-house we have a design team that can design your custom cable & accessories.
