

INTRODUCTION

The Baicells AtomOD15G Outdoor High-Gain CPE provides superior performance and routing capabilities to bring broadband data and voice services to end-users. It operates on standard LTE TDD, supports multiple bands, and complies with 3GPP Release 12 CAT15 standards.

The AtomOD15 is available in two variants: The CAT-B CBSD, which requires SAS connectivity and CPI certification, and the EUD, which does not require SAS connectivity or CPI certification.

The CPE design incorporates UL 2x2 and DL 4x4 MIMO and RX diversity, enabling improved cell coverage and high-speed wireless communications. It also supports Carrier Aggregation (CA), which extends bandwidth, increases data rates, and improves overall network performance.

The product comes with a standard one-year warranty; an extended warranty is available.
